

Dell Latitude 7340 Ultralight: Strong performance plus business-essential features for privacy and productivity

vs. 13-inch Apple MacBook Air (2022)

Getting the features and resources your team needs goes a long way to boosting productivity and job satisfaction—no matter where they're logging their hours.

Reduce dongle dependence

Having a lighter system with more than a single type of accessory connection gives your team more options to plug-and-play in just about any work environment they find themselves in.

Dell™ Latitude™ 7340 Ultralight	13-inch Apple® MacBook Air® (2022)
2.41 lbs. system weight	2.67 lbs. system weight
2x Thunderbolt™ 4 ports	2x Thunderbolt 4 ports
1x USB-A port	Thunderbolt + dongle
1x HDMI® port	Thunderbolt + dongle
1x headphone jack	1x headphone jack

Increase privacy

With more employees working in public spaces, coworking locations, and hot desking or office hoteling on campus, the need for privacy is more important than ever. We verified:

Onlooker detection*

Dell Optimizer Intelligent Privacy applied a texture to the screen when someone was standing behind our tester.

Look Away Dim*

Dell Optimizer Intelligent Privacy dimmed the screen when our tester looked away.

Walk Away Lock

Dell Optimizer Intelligent Privacy locked the screen 30 seconds after our tester walked away. We also verified that you could enable Automatic log-out on the MacBook Air, which automatically turns off the system after a specified length of keyboard inactivity.

Wake on Approach*

Dell Optimizer Intelligent Privacy unlocked the screen when our tester reapproached the laptop.

**Not available with the 13-inch Apple MacBook Air (2022).*

Keep your team productive—no matter where they are

In our hands-on tests, a 13-inch Dell Latitude 7340 Ultralight powered by an Intel® vPro® with Intel Core™ i7-1365u processor received higher general performance benchmark scores both plugged in (AC power) and unplugged (DC power) than a 13-inch Apple MacBook Air (2022) powered by an Apple M2 chip.
