

Save server management time and effort for IT staff

OpenManage Mobile and Quick Sync 2 make it faster and easier to perform a subset of common management tasks for new 14th generation Dell EMC PowerEdge servers powered by the Intel Xeon processor Scalable family

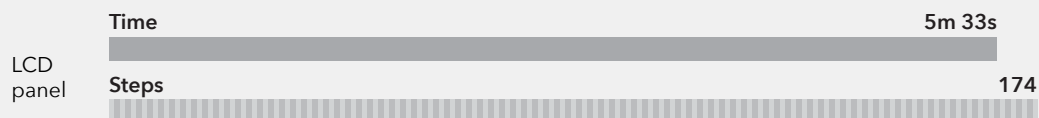

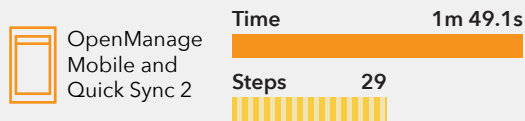

Quickly view server information to verify system settings

Up to 77% less time to view server inventory, firmware, and network details

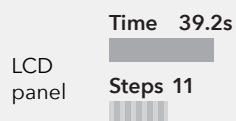

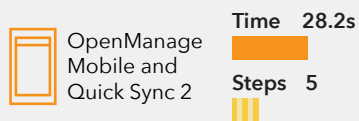

Easily perform basic server setup for quick deployment

Up to 145 fewer steps to set IP address and network settings

Troubleshoot more rapidly to attain less downtime

Up to 28% less time to view system events and Lifecycle Controller logs

Save time and effort on other tasks, too

Up to 30% less time and 16 fewer steps on basic server setup vs. using a crash cart

Up to 62% less time and 29 fewer steps to view network details vs. using the LCD panel
