# BALANCING POWER AND PERFORMANCE

## Take control of your datacenter with Intel® Node Manager

Managing datacenter power with Intel Node Manager maximized performance per watt on various workloads by up to 42.8 percent.*

### MIXED WORKLOADS

**42.8% more power efficient**

119
84
Exchange tasks per watt

### MEMORY-INTENSIVE WORKLOADS

**13.2% more power efficient**

2,790
2,488
Java business operations per second per watt

with Intel Node Manager power management
with no power management

### STORAGE-INTENSIVE WORKLOADS

**19.7% more power efficient**

1,256
1,049
Database operations per minute per watt

### CPU-INTENSIVE WORKLOADS

**11.1% more power efficient**

0.40
0.36
VDI sessions per watt
