Want better tablet browsing?

A better Web browsing experience with Intel Inside®
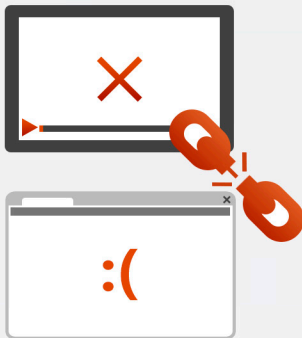

We visited more than 400 popular Web pages[1]

The three non-Intel® Atom™ processor-based tablets ran into a lot of troubles:
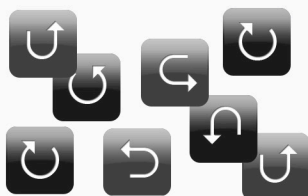

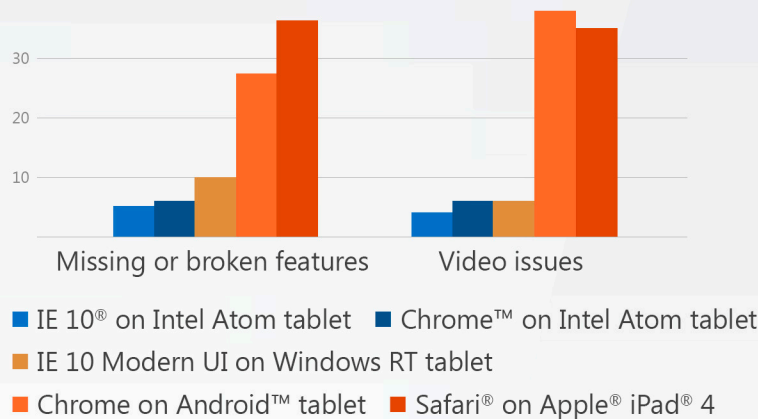

Problems, problems, problems

The non-Intel-based tablets had difficulties loading up to 28.8% of the Web sites we tested:

Failure to load and/or play videos

Missing or broken features and links on Web sites

Errors while loading Web sites

- IE 10® on Intel Atom tablet
- Chrome™ on Intel Atom tablet
- IE 10 Modern UI on Windows RT tablet
- Chrome on Android™ tablet
- Safari® on Apple® iPad® 4

Stumbling blocks

Those tablets had to rely on workaround apps for some Web sites to load

Roadblocks to a smooth Web experience

48.8%   37.3%   13.9%

The other tablets had issues with a wide array of Web-based technologies:

- Adobe® Flash®
- Touchscreen
- HTML5
- Java
- Microsoft® Silverlight®
- Parallax scrolling
- WebGL
- Other
