

Upgrade to better-performing storage without breaking the bank

Toshiba RM5 Series Value SAS SSDs provided better storage performance for an Oracle Database 12c workload than Samsung Enterprise SATA SSDs

Improve transactional database workload performance

Deliver over 2X the IOPS with Toshiba RM5 Value SAS SSDs

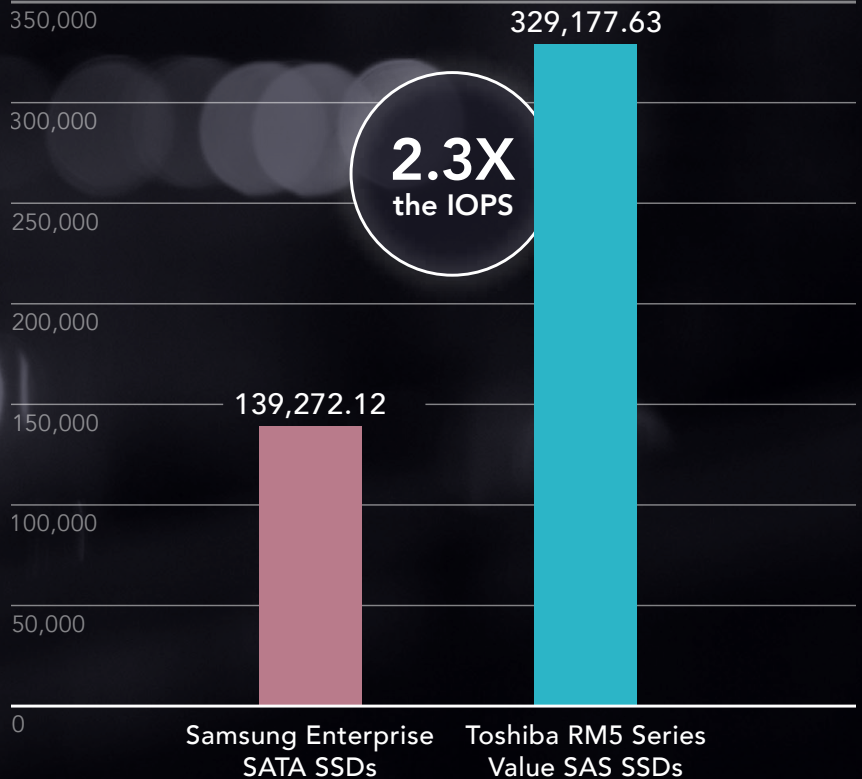

Your organization and its users demand results as fast as possible. SAS SSDs typically read and write information much faster than SATA SSDs, enabling your organization to better match service to customer demand.

More storage IOPS can mean more sales for your company and more happy customers.

Input/output operations per second (IOPS) results

Total reads and writes per second
